FOREIGN DIRECT INVESTMENT IN THE UNITED STATES:
1992 BENCHMARK SURVEY, PRELIMINARY RESULTS

ERRATA

Attached are corrected versions of tables B-2, B-4, and C-1, which incorporate corrected estimates of U.S. affiliates' capital stock and retained earnings. In table B-2, the corrections affect the estimates of capital stock and retained earnings for all industries combined and for real estate. In table B-4, the corrections affect the estimates of capital stock and retained earnings for all countries combined, Europe, Germany, and the European Communities (12). In table C-1, the corrections affect the estimates of owners' equity, excluding retained earnings, for all industries combined and for real estate.

Foreign Direct Investment in the United States:

1992 Benchmark Survey, Preliminary Results

This publication presents preliminary data on the financial structure and operations of nonbank U.S. affiliates of foreign direct investors from the 1992 Benchmark Survey of Foreign Direct Investment in the United States. A U.S. affiliate is a business enterprise in which there is foreign direct investment—that is, in which a single foreign person owns or controls, directly or indirectly, 10 percent or more of the voting securities or an equivalent interest. These data supplement those in “U.S. Affiliates of Foreign Companies: 1992 Benchmark Survey Results” in the July 1994 *SURVEY of CURRENT BUSINESS*. That article highlights the preliminary results of the 1992 benchmark survey and discusses changes in the share of the U.S. economy accounted for by U.S. affiliates since 1987, the year of the last benchmark survey.

Benchmark surveys are the most comprehensive surveys of foreign direct investment conducted by the Bureau of Economic Analysis (BEA) in terms of both coverage of companies and subject matter. The 1992 survey covered all U.S. affiliates of foreign direct investors that had assets, sales, or net income of more than \$1 million. It collected detailed information on the financial structure and operations of U.S. affiliates as well as on transactions and positions between the U.S. affiliates and their foreign parents.

The data for 1992 in this publication update universe estimates for 1977–91 contained in other BEA publications. (The estimates for all years are also available on computer diskette; ordering information for the publications and diskettes is at the back of this publication.) For similar items, the benchmark survey data in this publication are comparable to the universe totals for earlier years, which were either reported in BEA’s 1980 and 1987 benchmark surveys or estimated from sample data reported in BEA’s annual surveys of foreign direct investment in the United States. Some data presented here, such as more detailed data on the industry of the ulti-

mate beneficial owners of U.S. affiliates, were collected for the first time in the 1992 benchmark survey. Other data—such as employees covered by collective bargaining agreements, U.S. merchandise trade by product and by destination and origin, and gross property, plant, and equipment used for manufacturing—were collected in previous benchmark surveys but not in the annual surveys for nonbenchmark years. Still other data—namely, those on U.S. affiliate gross product and selected data for majority-owned affiliates—although computed previously and published elsewhere by BEA, are included in this publication for the first time and will be included in future annual and benchmark survey publications on a regular basis.

The estimates of U.S. affiliate gross product in this publication (tables M-1 through M-3) update estimates for earlier years that appeared in various issues of the *SURVEY*.¹ Gross product is an economic accounting measure of the production of goods and services. For a firm, gross product can be calculated as its gross output (sales or receipts and other operating income, plus inventory change) less its intermediate inputs (purchased goods and services); as such, gross product measures value added by the firm. Alternatively, gross product can be calculated by summing costs and profits, which is the method used to prepare the estimates for U.S. affiliates presented here.²

The data on majority-owned affiliates (tables N-1 through N-5) update and extend data for earlier years presented in various issues of the *SURVEY*. They cover

1. Estimates for 1988–91 appeared in “U.S. Affiliates of Foreign Companies: 1992 Benchmark Survey Results” (that article also presented estimates for 1992 in somewhat less detail than is shown here). Estimates for 1987 and for 1977–80 appeared in “Gross Product of U.S. Affiliates of Foreign Direct Investors, 1987–90” in the November 1992 *SURVEY* and “Gross Product of U.S. Affiliates of Foreign Companies, 1977–87” in the June 1990 *SURVEY*, respectively.

nonbank U.S. affiliates that are owned more than 50 percent by foreign direct investors. Data in other tables in this publication cover all nonbank U.S. affiliates—that is, all nonbank U.S. companies that are owned 10 percent or more by a foreign direct investor.

In some instances, data items collected separately in the benchmark survey may have been combined with other items in the annual survey. Thus, two or more items that were combined in a table in the annual survey publications may be shown separately in a table in this publication.

These preliminary benchmark survey results include estimates of data for reports not received or processed in time for publication. The degree of estimation was small, particularly for key items—for example, only 3 percent of both total assets and employment was estimated. Most of the estimation was for small affiliates. The amount of estimation is significantly smaller than was the case in the preliminary data from the 1987 benchmark survey because new procedures have shortened processing time and made it possible to use data from reports that have not been fully processed. Revised results, incorporating data from reports received and processed after publication of these preliminary results, will be published next year. Revisions are expected to be small overall. However, they could be sizable for some individual countries, industries, States, or items, particularly those in which small affiliates predominate.

Because of time and resource constraints, this publication—like the annual publications for earlier years—covers only data on the overall financial structure and operations of nonbank U.S. affiliates. Data collected in the benchmark survey on banks and on transactions and positions between U.S. affiliates and their foreign parents are not included. The revised data to be published next year will be considerably more detailed than the data in this publication, will cover both bank and nonbank affiliates, and will include data on transactions and positions between affiliates and parents as well as on the U.S. affiliates' overall operations.

The coverage of the nonbank U.S. affiliate data for 1992 differs from that for earlier years because the 1992 data exclude savings institutions and credit unions, whereas the data for earlier years include these businesses. The change in coverage reflects the reclassification of savings institutions and credit unions from the "finance, except banking" industry (which is covered by the nonbank data) to the banking industry. In 1991, U.S. affiliates that were savings and loans or credit unions had total assets of \$27 billion, sales of \$2.2 billion, and employment of 6,800 (compared to total assets of \$382

billion, sales of \$33 billion, and employment of 57,900 for all affiliates classified in "finance, except banking").

Except for the change in the classification of savings institutions and credit unions, the concepts and definitions underlying the 1992 data in this publication are essentially the same as those for BEA's 1987 benchmark survey, as described in *Foreign Direct Investment in the United States: 1987 Benchmark Survey, Final Results*. Definitions of items collected for the first time in the 1992 benchmark survey, and presented here, are given in the footnotes to the tables. A full methodology of the 1992 survey will accompany the revised data to be published next year.

In the 1992 benchmark survey, a long form, requesting information in considerable detail, was filed by affiliates with assets, sales, or net income greater than \$50 million. To minimize the burden on survey respondents, a short form, containing less detail, was introduced for filing by smaller affiliates. For these affiliates, BEA has estimated

Establishment Data Availability

Copies of publications presenting establishment-level data for 1987, 1989, and 1990 may be obtained from the Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954. The data are also available on diskettes which may be obtained from BEA.

To place orders use the BEA and GPO order forms at the back of this publication. Orders should specify the appropriate stock number or accession number, the title of the publication or diskette (including the year of the data), and the price of the publication or diskette. Payment must accompany all orders.

In some cases, the Census Bureau may make special tabulations or perform regressions or other statistical analyses of the data at cost, within the limits of available resources and subject to the legal requirements to avoid disclosure of data of individual companies. A request for a cost estimate as well as exact specifications of the type of tabulations or analyses wanted should be directed to Chief, Industry Division, Bureau of the Census, Washington, DC 20233.

Ordering information for publications and diskettes covering BEA's enterprise data on foreign direct investment in the United States is at the back of this publication.

the items that appear only on the long form, so that the published results are presented in the same detail for all affiliates.

For consistency, the table-numbering scheme in this publication, as in the publications for earlier years, follows that in the 1987 benchmark survey publication. For tables that present data not collected in 1987 or that are included for the first time in this publication, new table numbers are introduced.

The data in this publication are based on data collected at the enterprise—or company—level. Establishment—or plant—level data on foreign direct investment in the United States are also available as a result of an ongoing project to link BEA's enterprise data on foreign direct investment in the United States with more detailed Census Bureau establishment data for all U.S. companies. Publications presenting the establishment data are available for 1987–90 (see box for ordering information). The 1987 publication presents data on the number, employment, payroll, and shipments or sales of the establishments of U.S. affiliates in both manufacturing and nonmanufacturing industries. Summary data and an analysis appeared in "Foreign Direct Investment in the United States: Establishment Data for 1987" in the October 1992 SURVEY. The 1988–90 publications present data on the manufacturing establishments of U.S. affiliates for most of the items covered by the Census Bureau's Annual Survey of Manufactures (ASM), including value added, shipments, employment, total employee compensation, employee benefits, hourly wage rates of production workers, cost of materials and energy used, inventories by stage of fabrication, and expenditures for new plant and equipment. Summary data for 1990 and an analysis of the data appeared in "Characteristics of Foreign-Owned

U.S. Manufacturing Establishments" in the January 1994 SURVEY.³

In some cases, BEA may make special tabulations or perform regressions or other statistical analyses of the survey data at cost, within the limits of available resources and subject to the legal requirements to avoid disclosure of data of individual companies. However, because of the high degree of detail in which BEA's data are regularly produced and because of concerns about confidentiality, data quality, and consistency of presentation, the Bureau has adopted a policy of generally limiting tabulations to those regularly produced. Data users requiring special tabulations should submit their requests, including a justification of need, in writing, and BEA will consider each request on a case-by-case basis. Requests should be directed to: International Investment Division (BE-50), Data Retrieval and Analysis Branch, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, D.C. 20230.

For further information on special tabulations, call (202) 606–9868. For other assistance, contact William Zeile (analysis) at 606–9893 or David Galler (data) at (202) 606–9835. Both can be contacted by writing to International Investment Division (BE-50), Research Branch, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, D.C., or call (202) 606–9893.

3. A parallel project has also linked BEA's data on foreign direct investment in the United States to Bureau of Labor Statistics (BLS) data on all U.S. businesses. That link resulted in data, released by BLS, for 1989 and 1990 on the number, employment, and payroll of establishments of U.S. affiliates for both manufacturing and nonmanufacturing industries. In addition, BLS data are available on the occupational structure of manufacturing establishments of U.S. affiliates in 1989. For information on these data, call BLS at (202) 606–6568. Data from the two link projects differ, particularly at the most detailed industry levels, because of differences in coverage, classification, timing, and definitions.

TABLES

General Notes to Tables

- The estimates are on a fiscal year basis; an affiliate's fiscal year is defined as the financial reporting year that ended in that calendar year. Unless otherwise specified, all balances are as of the close of fiscal year 1992.
- Detail may not add to totals because of rounding.
- An asterisk "*" indicates a value between -\$500,000 and \$500,000, less than 500 acres, or fewer than 50 employees, as appropriate.
- Cells that show employment that have been suppressed to avoid disclosure of data of individual companies contain a letter representing the employment size range for the cell (size ranges are given at the bottom of the appropriate tables). Cells for all other items that have been suppressed contain a "(D)."
- The tables cover only nonbank U.S. affiliates. Beginning with this publication, nonbank affiliates exclude savings institutions and credit unions, which have been reclassified to banking.
- A "U.S. affiliate" is a U.S. business enterprise in which a single foreign person owns or controls, directly or indirectly, 10 percent or more of the voting securities if the enterprise is incorporated or an equivalent interest if the enterprise is unincorporated.
- A "majority-owned U.S. affiliate" is a U.S. affiliate in which the foreign person's ownership exceeds 50 percent.
- A "foreign parent" is the first person outside the United States in a U.S. affiliate's ownership chain that has a direct investment interest in the affiliate.
- An "ultimate beneficial owner" (UBO) is that person, proceeding up a U.S. affiliate's ownership chain, beginning with and including the foreign parent, that is not owned more than 50 percent by another person.
- A "foreign parent group" consists of (1) the foreign parent, (2) any foreign person, proceeding up the foreign parent's ownership chain, that owns more than 50 percent of the person below it, up to and including the UBO, and (3) any foreign person, proceeding down the ownership chain(s) of each of these members, that is owned more than 50 percent by the person above it.
- Unless otherwise indicated, the major industry classification "petroleum" includes all of the various three-digit BEA petroleum subindustries. All other major industries exclude these petroleum subindustries. For example, mining excludes crude petroleum (no refining) and gas; manufacturing excludes petroleum refining and coal products; retail trade excludes gasoline service stations; and wholesale trade excludes petroleum wholesale trade.
- In these tables, "finance, except banking" includes holding companies.
- For tables that do not show every country or industry, the individual countries or industries included in a country or industry group shown in the heading or stub may be ascertained by referring to table A-2 (for countries) or table A-1 (for industries).
- The European Communities (12) comprises Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, and the United Kingdom.
- OPEC is the Organization of Petroleum Exporting Countries. Through yearend 1992, its members were Algeria, Ecuador, Gabon, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, the United Arab Emirates, and Venezuela.
- In the tables disaggregated by State, "other U.S. areas" consists of the Virgin Islands, Guam, American Samoa, U.S. offshore oil and gas sites, and all other outlying U.S. areas. The "foreign" category, for employment, consists of employees of U.S. affiliates working abroad; for assets, it consists primarily of movable fixed assets temporarily located outside the United States and any foreign assets.
- In the tables disaggregated by industry of UBO, "government and government-related entities" includes foreign governments, government-owned or -sponsored agencies, quasi-government organizations, and government-run pension funds.
- All footnotes follow the last table.

Footnotes to Tables

Tables A-1, A-2, and A-2A

1. This column shows the number of companies consolidated on affiliate reports. The number of companies consolidated is substantially higher than the number of affiliates because the report for a single affiliate may represent the consolidation of many individual companies.

Table A-7

1. For industry classification, each U.S. affiliate was required to disaggregate its sales by three-digit International Surveys Industry Classification code; the affiliate was classified in the industry in which its sales were largest. When sales and employment are disaggregated by industry of affiliate, total sales and employment of a given affiliate are shown in the single industry in which the affiliate was classified; when disaggregated by industry of sales, they are distributed among all the industries in which the affiliate reported sales—i.e., sales and employment associated with each industry of sales are shown in that industry regardless of the affiliate's industry of classification.
2. In the breakdown of sales and employment by industry of sales, U.S. affiliates that filed the long form in the benchmark survey had to specify their eight largest sales categories, and U.S. affiliates that filed the short form had to specify their three largest sales categories. Sales and employment in all unspecified industries combined are shown on this line. Also, employees working in central administrative offices or headquarters, and not associated with a particular industry of sales, are included on this line rather than being allocated among the various other industries of sales.

Table A-8

1. A given affiliate is counted once in the all-U.S. total. It is also counted once in each State in which it has property, plant, and equipment or employment. Because an affiliate may have property, plant, and equipment or employment in more than one State, the sum across States exceeds the all-U.S. total.

Tables B-2 and B-4

1. Includes common and preferred stock and additional paid-in capital, less treasury stock.
2. Includes cumulative translation adjustments for all affiliates and total owners' equity of those unincorporated affiliates that could not provide detail on equity by type.

Table C-1

1. For unincorporated affiliates that could not provide detail on equity by type, includes total owners' equity. Because these affiliates' cumulative retained earnings—which are an internal, not an external, source of funds—were not reported separately, they could not be excluded.
2. Consists of current and noncurrent financial investments. In previously published annual and benchmark survey data on foreign direct investment in the United States, this item covered only noncurrent financial investments.
3. For all industries combined and for each of the selected industries shown, data on this line are related to data in tables B-1 and B-2 in this publication as follows: Column 2 (of this table) equals column 3 of table B-2; column 5 equals column 6 of table B-2 plus that part of column 8 of table B-2 that is total owner equity of unincorporated affiliates that could not provide detail on equity by type; column 7 equals column 4 of table B-1, plus that part of column 9 of table B-1 that is noncurrent receivables; and column 8 equals that part of column 6 of table B-1 that is current financial investments plus that part of column 9 of table B-1 that is noncurrent financial investments.

Table D-1

1. Equals column 2 plus 3 and column 4 plus 5. Also equals column 13 of table D-8 and column 1 of table D-10.
2. Includes mineral rights and minor amounts of property other than land.

Table D-2

1. Equals column 2 plus 3 and column 4 plus 5. Also equals column 13 of table D-9 and column 1 of table D-11.
2. Includes mineral rights and minor amounts of property other than land.

Table D-8

1. Includes like charges.
2. Includes the net book value of transfers of property, plant, and equipment to the affiliate from related companies. Equals column 2 of table D-25.
3. Includes transfers of property, plant, and equipment from the affiliate to related companies.
4. Represents restatements resulting from a change in the entity; revaluations of property, plant, and equipment to a fair market or appraised value; and the property, plant, and equipment balance on the date of acquisition of affiliates that were acquired during the year, less the closing FY 1991 balance of affiliates that left the universe in 1992. (Affiliates would have left the universe if they were liquidated or if the foreign parents' interest was otherwise reduced below 10 percent in 1992.) For an individual industry, may also reflect the net book value of property, plant, and equipment of affiliates whose industry classification changed in 1992. A positive value would be recorded in the industry the affiliate entered, and a negative value of the same amount would be recorded in the industry it left. Because such changes are offsetting among industries, they do not affect the all-industries total.
5. Equals column 1 of tables D-1, D-3, and D-10.

Table D-9

1. Includes like charges.
2. Includes the net book value of transfers of property, plant, and equipment to the affiliate from related companies. Equals column 2 of table D-26.
3. Includes transfers of property, plant, and equipment from the affiliate to related companies.
4. Represents restatements resulting from a change in the entity; revaluations of property, plant, and equipment to a fair market or appraised value; and the property, plant, and equipment balance on the date of acquisition of affiliates that were acquired during the year, less the closing FY 1991 balance of affiliates that left the universe in 1992. (Affiliates would have left the universe if they were liquidated or if the foreign parents' interest was otherwise reduced below 10 percent in 1992.) For an individual country, may also reflect the net book value of property, plant, and equipment of affiliates whose country classification changed in 1992. A positive value would be recorded in the country the affiliate entered, and a negative value of the same amount would be recorded in the country it left. Because such changes are offsetting among countries, they do not affect the all-countries total.
5. Equals column 1 of tables D-2 and D-11.

Table D-10

1. Equals column 1 of table D-1 and column 13 of table D-8.
2. Consists of the gross book value of property, plant, and equipment used for manufacturing, including petroleum refining.
3. Consists of the gross book value of all commercial buildings and associated land owned by the affiliate that is either used or operated by the affiliate or leased or rented to others. Commercial buildings include apartment buildings, office buildings, hotels, motels, and buildings used for wholesale, retail, and services trades such as shopping centers, recreational facilities, department stores, bank buildings, restaurants, public garages, and automobile service stations.
4. Includes the gross book value of property, plant, and equipment used for agriculture, mining, petroleum and natural gas extraction, passenger and freight transportation, communication, and electric, gas, steam, water, and sanitary services. Also includes the gross book value of equipment used in commercial buildings.

Table D-11

1. Equals column 1 of table D-2 and column 13 of table D-9.
2. Consists of the gross book value of property, plant, and equipment used for manufacturing, including petroleum refining.
3. Consists of the gross book value of all commercial buildings and associated land owned by the affiliate that is either used or operated by the affiliate or leased or rented to others. Commercial buildings include apartment buildings, office buildings, hotels, motels, and buildings used for wholesale, retail, and services trades such as shopping centers, recreational facilities, department stores, bank buildings, restaurants, public garages, and automobile service stations.
4. Includes the gross book value of property, plant, and equipment used for agriculture, mining, petroleum and natural gas extraction, passenger and freight transportation, communication, and electric, gas, steam, water, and sanitary services. Also includes the gross book value of equipment used in commercial buildings.

Table D-12

1. Consists of the gross book value of property, plant, and equipment used for manufacturing, including petroleum refining.
2. Consists of the gross book value of all commercial buildings and associated land owned by the affiliate that is either used or operated by the affiliate or leased or rented to others. Commercial buildings include apartment buildings, office buildings, hotels, motels, and buildings used for wholesale, retail, and services trades such as shopping centers, recreational facilities, department stores, bank buildings, restaurants, public garages, and automobile service stations.
3. Includes the gross book value of property, plant, and equipment used for agriculture, mining, petroleum and natural gas extraction, passenger and freight transportation, communication, and electric, gas, steam, water, and sanitary services. Also includes the gross book value of equipment used in commercial buildings.

Table D-13

1. In this table, all data for a given U.S. affiliate are shown in the single industry in which the affiliate was classified, based on its U.S. operations as a whole. The affiliate's activity in a particular State may differ from that of its U.S. operations as a whole. These same data disaggregated by State and cross-classified by use, as shown in table D-12, may better indicate affiliates' activities in each individual State.

Table D-18

1. Consists of the gross book value of property, plant, and equipment used for manufacturing, including petroleum refining.

Tables D-20 and D-21

1. Consists of the gross book value of all commercial buildings and associated land owned by the affiliate that is either used or operated by the affiliate or leased or rented to others. Commercial buildings include apartment buildings, office buildings, hotels, motels, and buildings used for wholesale, retail, and services trades such as shopping centers, recreational facilities, department stores, bank buildings, restaurants, public garages, and automobile service stations.

Table D-22

1. A given affiliate is counted once in the all-U.S. total; it is also counted once in each State in which it has property, plant, and equipment. Because an affiliate may have property, plant, and equipment in more than one State, the sum across States exceeds the all-U.S. total.

Table D-24

1. A given affiliate is counted once in the total for all use categories combined; it is also counted once in each use category in which it has property, plant, and equipment. Because an affiliate may have property, plant, and equipment in more than one use category, the sum across use categories exceeds the total for all use categories combined.
2. Consists of affiliates with property, plant, and equipment used for manufacturing, including petroleum refining.
3. Consists of affiliates with commercial property. Commercial property includes all commercial buildings and associated land owned by the affiliate that is either used or operated by the affiliate or leased or rented to others. Commercial buildings include apartment buildings, office buildings, hotels, motels, and buildings used for wholesale, retail, and services trades such as shopping centers, recreational facilities, department stores, bank buildings, restaurants, public garages, and automobile service stations.
4. Consists of affiliates with property, plant, and equipment used for agriculture, mining, petroleum and natural gas extraction, passenger and freight transportation, communication, and electric, gas, steam, water, and sanitary services.
5. A given affiliate is counted once in the all-U.S. total; it is also counted once in each State in which it has property, plant, and equipment. Because an affiliate may have property, plant, and equipment in more than one State, the sum across States exceeds the all-U.S. total.

Tables D-25 and D-26

1. Includes the net book value of transfers of property, plant, and equipment to the affiliate from related companies.
2. Equals column 2 plus column 8.
3. Equals column 5 of table D-8 or D-9.
4. Includes a minor amount of expenditures for property other than land and mineral rights.

Table D-27

1. Includes the net book value of transfers of property, plant, and equipment to the affiliate from related companies.

Table D-28

1. Includes the net book value of transfers of property, plant, and equipment to the affiliate from related companies.
2. Includes a minor amount of expenditures for property other than land and mineral rights.

Tables E-1 and E-2

1. Consists of gains or losses resulting from the sale or other disposition of assets; changes in the dollar value of the affiliates' foreign-currency-denominated assets and liabilities that are caused by changes in exchange rates; and all other recognized capital gains or losses, including those resulting from the revaluation of assets, whether or not realized.

Tables E-7 and E-8

1. For industry classification, each U.S. affiliate was required to disaggregate its sales by three-digit International Surveys Industry Classification code; the affiliate was classified in the industry in which its sales were largest. When sales are disaggregated by industry of affiliate, total sales of a given affiliate are shown in the single industry in which the affiliate was classified; when disaggregated by industry of sales, they are distributed among all the industries in which the affiliate reported sales—i.e., sales associated with each industry of sales are shown in that industry regardless of the affiliate's industry of classification.
2. In the breakdown of sales by industry of sales, U.S. affiliates that filed the long form in the benchmark survey had to specify their eight largest sales categories, and U.S. affiliates that filed the short form had to specify their three largest sales categories. Sales in all unspecified industries combined are shown on this line.

Tables E-12 and E-13

1. Sales of goods are defined as sales generated by activities characteristic of the following group of industries: Agriculture, except agricultural services; mining, except mining services; construction; petroleum, except petroleum services; manufacturing; and wholesale and retail trade.
2. Sales of services are defined as sales generated by activities characteristic of the following group of industries: The "services" division of the Standard Industrial Classification (and the International Surveys Industry Classification) system, petroleum services, finance, insurance, real estate, agricultural services, mining services, transportation, communications, and public utilities.
3. Consists of investment income that is included in "sales or gross operating revenues" in the income statement. In finance and insurance, affiliates include investment income in sales because it is generated by a primary activity of the company. In most other industries, affiliates consider investment income an incidental revenue source and include it in the income statement in a separate "other income" category; such investment income is not included in the affiliates' sales or in this column.
4. Consists of any sales to foreign business enterprises in which the U.S. affiliate has a 10-percent-or-more ownership interest.

Table E-14

1. Sales of goods are defined as sales generated by activities characteristic of the following group of industries: Agriculture, except agricultural services; mining, except mining services; construction; petroleum, except petroleum services; manufacturing; and wholesale and retail trade.

Tables E-15 and E-16

1. Sales of services are defined as sales generated by activities characteristic of the following group of industries: The "services" division of the Standard Industrial Classification (and the International Surveys Industry Classification) system, petroleum services, finance, insurance, real estate, agricultural services, mining services, transportation, communications, and public utilities.

Tables F-1 and F-2

1. Consists of all employees engaged in research and development, including managers, scientists, engineers, and other professional and technical employees.

Table F-7

1. In this table, all data for a given U.S. affiliate are shown in the single industry in which the affiliate was classified, based on its U.S. operations as a whole. The affiliate's activity in a particular State may differ from that of its U.S. operations as a whole. Table F-14 provides a better indication of affiliates' manufacturing employment by State. In that table, manufacturing employment covers only employees on the payrolls of manufacturing plants located in the State.

Tables F-10 and F-11

1. For industry classification, each U.S. affiliate was required to disaggregate its sales by three-digit International Surveys Industry Classification code; the affiliate was classified in the industry in which its sales were largest. When employment is disaggregated by industry of affiliate, total employment of a given affiliate is shown in the single industry in which the affiliate was classified; when disaggregated by industry of sales, it is distributed among all the industries in which the affiliate reported sales—i.e., the number of employees associated with each industry of sales is shown in that industry regardless of the affiliate's industry of classification.
2. In the breakdown of employment by industry of sales, U.S. affiliates that filed the long form in the benchmark survey had to specify their eight largest sales categories, and U.S. affiliates that filed the short form had to specify their three largest sales categories. Employment in all unspecified industries combined are shown on this line. Also, employees working in central administrative offices or headquarters, and not associated with a particular industry of sales, are included on this line rather than being allocated among the various other industries of sales.

Table F-14

1. Manufacturing employees are employees on the payroll of manufacturing plants located in the State—including employees on the payroll of petroleum refineries—and employees in central administrative offices and auxiliary units if these units primarily serve manufacturing plants.

Table F-15A

1. Consists of all employees engaged in research and development, including managers, scientists, engineers, and other professional and technical employees.

Table F-19

1. A given affiliate is counted once in the all-U.S. total; it is also counted once in each State in which it has employment. Because an affiliate may have employment in more than one State, the sum across States exceeds the all-U.S. total.

Tables G-1 and G-2

1. Consists of exports to or imports from foreign business enterprises in which the U.S. affiliate has a 10-percent-or-more ownership interest.

Tables G-9–G-11, G-16, and G-17

1. Includes mineral waxes and natural and manufactured gas.

Tables G-22–G-24, G-29, and G-30

1. A U.S. affiliate was required to disaggregate its U.S. exports and imports by country of destination or origin only for those countries to which its exports, or from which its imports, were \$500,000 or more. Its exports to, or imports from, all other countries were reported as a single item and are classified in "unallocated." Also, for estimated reports, most exports to, and imports from, unaffiliated foreigners are included in this category.

Tables G-35 and G-36

1. Capital equipment and other goods charged to fixed asset accounts.
2. Includes \$96.5 million of imports of fuels, spare parts, and supplies used by affiliates.
3. Includes \$28.0 million of imports of fuels, spare parts, and supplies used by affiliates.
4. Includes \$68.6 million of imports of fuels, spare parts, and supplies used by affiliates.

Tables H-1 and H-2

1. Includes withholding taxes.

Tables H-3A and H-3B

1. Comparable to column 3 of tables H-1 and H-2 in the annual survey publications for previous years.
2. Amounts shown in this column are on the same basis as research and development expenditures totals for all U.S. businesses shown in National Science Foundation publications.

Table H-4

1. Equals column 1 of table H-3A.

Table M-1

1. Profit-type return is an economic accounting measure of profits from current production. It is equal to net income (column 10 of table E-1) plus U.S. income taxes (column 8 of table E-1) minus income from equity investments (column 3 of table E-1) minus capital gains (losses) (column 4 of table E-1) plus depletion (column 7 of table D-8) plus inventory valuation adjustment. The inventory valuation adjustment, which removes inventory profits (profits that result because inventories may be valued at historical cost rather than at replacement cost) from profit-type return, is estimated by BEA.
2. Equals interest payments (column 2 of table H-1) plus imputed interest paid minus interest receipts (column 1 of table H-1) minus imputed interest received. Imputed interest paid and received, which are measures of the value of services provided by life insurance carriers and financial intermediaries without payment, are estimated by BEA.
3. Equals column 4 of table H-1.
4. Equals column 8 of table D-8.

Table N-1

1. Consists of the gross book value of all commercial buildings and associated land owned by the affiliate that is either used or operated by the affiliate or leased or rented to others. Commercial buildings include apartment buildings, office buildings, hotels, motels, and buildings used for wholesale, retail, and services trades such as shopping centers, recreational facilities, department stores, bank buildings, restaurants, public garages, and automobile service stations.
2. Expenditures include the net book value of transfers of property, plant, and equipment to the affiliate from related companies.
3. Includes a minor amount of expenditures for property other than land and mineral rights.
4. Sales of goods are defined as sales generated by activities characteristic of the following group of industries: Agriculture, except agricultural services; mining, except mining services; construction; petroleum, except petroleum services; manufacturing; and wholesale and retail trade.
5. Sales of services are defined as sales generated by activities characteristic of the following group of industries: The "services" division of the Standard Industrial Classification (and the International Surveys Industry Classification) system, petroleum services, finance, insurance, real estate, agricultural services, mining services, transportation, communications, and public utilities.
6. Consists of investment income that is included in "sales or gross operating revenues" in the income statement. In finance and insurance, affiliates include investment income in sales because it is generated by a primary activity of the company. In most other industries, affiliates consider investment income an incidental revenue source and include it in the income statement in a separate "other income" category. Such investment income is not included in the affiliates' sales or in this line.
7. Manufacturing employees are employees on the payroll of manufacturing plants—including employees on the payroll of petroleum refineries—and employees in central administrative offices and auxiliary units if these units primarily serve manufacturing plants.
8. Consists of all employees engaged in research and development, including managers, scientists, engineers, and other professional and technical employees.

Ordering Publications and Diskettes Containing BEA's Enterprise Data for U.S. Affiliates of Foreign Companies

Information on how to order publications and diskettes containing BEA's enterprise data on the operations of U.S. affiliates of foreign companies is given below. Order forms are provided on the following pages.

The diskettes for the 1977-92 estimates are available from BEA. The publications for the 1977-80 and the 1986 estimates are available from the National Technical Information Service (NTIS), the publications for the 1981-85 estimates are available from BEA, and the publications for the 1987-92 estimates are available from the U.S. Government Printing Office (GPO).

To place orders, use the BEA, GPO, and NTIS order forms provided on the following pages. Orders should specify the appropriate accession number or stock number, the title of the publications or diskettes (including the years of the estimates), and the price of the publication or of the diskette. Payment must accompany all orders.

Comprehensive Information on the U.S. Economy

The SURVEY OF CURRENT BUSINESS provides the broad scope and the statistical detail to keep you informed, month by month, about U.S. economic conditions. It is the journal of record for many of the headline-making economic statistics that influence decisionmakers in business and government, including:

- Gross domestic product (GDP),
- Personal income (both national and regional),
- Leading economic indicators, and
- U.S. balance of payments.

The SURVEY's articles analyze these numbers and present the statistical detail and methodologies that underlie them.

The SURVEY also contains the "Business Cycle Indicators" section, which consists of tables for about 270 series and charts for about 130 series that are widely used in analyzing current cyclical developments.

To keep up with the rapidly changing U.S. economy, subscribe to the SURVEY OF CURRENT BUSINESS today.
